

Mechanical and Mechatronics Engineering

F1000Research

<https://f1000research.com/>

F1000Research is an Open Research publishing platform for scientists, scholars and clinicians offering rapid publication of articles and other research outputs without editorial bias. All articles benefit from transparent peer review and editorial guidance on making all source data openly available.

Academic Journals

<https://academicjournals.org/journals.htm>

Provides access to full-text articles in the Social Sciences, Biological Sciences, Engineering, Arts & Education and Legal Studies

Directory of Open Access Journals (DOAJ)

<https://doaj.org/>

An online directory that indexes and provides access to high quality, open access, peer-reviewed journals

E-Books Directory

<http://www.e-booksdirectory.com/>

A daily growing list of freely downloadable ebooks (9425 free e-books in 666 categories), documents and lecture notes

Electronic Journals Library (EZB)

<http://ezb.uni-regensburg.de/ezeit/index.phtml?bibid=AAAAA&colors=7&lang=en>

Offers online access to articles published in scientific and academic journals. Currently, 486 libraries and research institutions take advantage of this service in their daily work (97 389 journals).

Emerald Open Research

<https://emeraldopenresearch.com/>

Emerald Open Research is a new and pioneering way to rapidly publish a range of research outputs, from original research articles to case studies and data notes. Research will be freely available to read, download and reuse, reaching a truly global audience. Emerald Open Research also offers open peer review, controlled by the author and an open data policy.

InTech open Books

<https://www.intechopen.com/books>

Read, share and download more than 5,600 peer-reviewed Open Access books covering **2606** Physical Sciences, Engineering and Technology **1022** Life Sciences **1752** Health Sciences **273** Social Sciences and Humanities Open Access Books.

MITOpenCourseWare

<https://ocw.mit.edu/>

MIT OpenCourseWare (OCW) is a web-based publication of virtually all MIT course content. OCW is open and available to the world and is a permanent MIT activity. Through OCW, educators improve courses and curricula, making their schools more effective; students find additional resources to help them succeed; and independent learners enrich their lives and use the content to tackle some of our world's most difficult challenges, including sustainable development, climate change, and cancer eradication.

Open Access Thesis & Dissertations

<https://oatd.org/>

OATD.org aims to be the best possible resource for finding open access graduate theses and dissertations published around the world. Metadata (information about the theses) comes from over 1100 colleges, universities, and research institutions. OATD currently indexes 6,129,917 theses and dissertations.

Open Research Library

openresearchlibrary.org

The **Open Research Library (ORL)** is planned to include all Open Access book content worldwide on one platform for user-friendly discovery, offering a seamless experience navigating more than 14,000 Open Access books. This vital infrastructure is slated to comprise the most comprehensive collection of peer-reviewed Open Access books accessible for everyone. Libraries investing in the Open Research Library contribute to the development of dedicated infrastructure for the global research community while participating libraries have the opportunity to benefit from a set of exclusive services.

Oxford Open

https://academic.oup.com/journals/pages/open_access

Includes full and optional open access to more than 100 journals drawn from every subject area

Virtual Labs

<https://www.vlab.co.in/about-us>

Virtual Labs project is an initiative of the Ministry of Human Resource Development (MHRD), Government of India under the aegis of National Mission on Education through Information and Communication Technology (NMEICT). This project is a consortium activity of twelve participating institutes and IIT Delhi is the coordinating institute. It is a paradigm shift in ICT-based education. For the first time, such an initiative has been taken up in remote experimentation. Under the Virtual Labs project, over 100 Virtual Labs consisting of approximately 700+ web-enabled experiments were designed for remote operation and viewing.
